

Sujin Park

sujin.park@gatech.edu

INTERESTS

Operating Systems, File/Storage Systems, Virtualization

EDUCATION

Georgia Institute of Technology

Ph.D. in Computer Science (*Advisor: Prof. Taesoo Kim*)

Atlanta, GA

Aug. 2019 – present

Sungkyunkwan University (SKKU)

B.S. in Software Engineering

Suwon, South Korea

Mar. 2014 – Feb. 2019

RESEARCH EXPERIENCE

Systems Software & Security Lab, Georgia Tech

Research Assistant (Advisor: Prof. Taesoo Kim)

Atlanta, GA

Aug. 2019 – present

- Currently working on introducing an user-programmable scalable lock design.

UCARE Lab, University of Chicago

Research Collaborator (Advisor: Prof. Haryadi Gunawi)

Chicago, IL

Mar. 2019 – Aug. 2019

- Worked on a project proposing a tail-evading flash array with predictable performance by avoiding tail latency with reconstructed late requests. Implemented write buffer cache and flush mechanism in flash emulation platform.

Distributed Computing Lab, SKKU

Full-time Research Intern (Advisor: Prof. Young Ik Eom)

Suwon, South Korea

Mar. 2017 – Feb. 2019

- Designed and conducted original research in the area of virtualization and introduced a novel virtual machine memory monitoring tool which focuses on classifying shared memory according to their characteristics [1, 2]
- Conducted research in the area of file systems, especially on Flash Translation Layer and I/O performance analysis using OpenSSD and various benchmarks [4].

Parallel Systems Architecture Lab, EPFL

Summer Intern (Advisor: Prof. Babak Falsafi)

Lausanne, Switzerland

Jun. 2018 - Aug. 2018

- Participated in QFlex project, a computer architecture simulation of multi-node system.
- Designed and implemented debugging tool for simulation. Parsed log files of the simulation, built database and systematized them to enable process tracking and error detection.

Machine to Machine Lab, Purdue University

Capstone Design Project (Advisor: Prof. Eric Matson)

West Lafayette, IN

Sep. 2017 - Dec. 2017

- Participated in project on multi-agent system with Argonne National Laboratory. Proposed a goal distribution strategy for distributed multi agent systems [3]. The approach was tested and verified using StarCraft II API and broker communication model.

PUBLICATIONS

[1] **Contextual Concurrency Control.**

TEACHING

Teaching Assistant, Georgia Tech Spring 2020
CS3210 – Designing Operating System
 • Building an operating system in Rust. Targets AArch64(ARM) architecture and tested on RPi3.

Teaching Assistant, SKKU Fall 2018
 Problem Solving and Algorithm course

HONORS AND AWARDS

Grace Hopper Conference Travel Grant 2019
Graduate Study Fellowship, Chungnam State Government, South Korea 2019-2021
Women Techmakers Scholars (Anita Borg Scholars), Google 2018
(acceptance rate: 0.3%=73/25000)

Research Assistantship and Travel Grant, EPFL *(acceptance rate: 2-3%)* 2018
Dean's List, Sungkyunkwan University *(awarded four consecutive semesters)* 2016-2018
Honor Scholarship, Sungkyunkwan University **2014-2018**
 K-SW Purdue Scholarship, South Korean Government (IITP) 2017
 Best Paper, Korea Computer Congress (KCC) 2017
 Impact Award in Develop with Google Final Contest 2017
 Finalist of Samsung Collegiate Programming Cup 2016
 1st place in Information Security Idea Contest, Sungkyunkwan University 2015

PATENTS

Young Ik Eom, Yongju Song, **Sujin Park**. Real-time Memory Share Monitoring for Virtualized Systems. KR-Patent 10-2018-0164420

SELECTED PROJECTS

Develop with Google Jan. 2018 - Feb. 2018
Student Software Engineer Google, South Korea
 Participated in weekly session and dealt with several software topics and skills, such as Android Things, static/dynamic linker, firebase and technical interviews.

Develop with Google Jan. 2017 - Feb. 2017
Student Software Engineer Google, South Korea
 Developed Chrome extension using HTML, JavaScript, CSS, jQuery, and Chrome extension API to help manage multiple tabs. Proposed and implemented features such as 'tab directory' and 'tab suspending'.

TECHNICAL SKILLS

Languages

- Advanced – C/C++, Python, Rust, Shell script
- Moderate – Java, HTML, CSS, JavaScript, Assembly Language (X86-64)

Software Skills

- Operating System
 - Virtualization
 - Storage device
 - Database
 - Performance Test
- **Linux Kernel Development**
 - KVM, QEMU, Docker
 - OpenSSD Jasmine Firmware, SSD Simulators
 - MySQL, Neo4j
 - Various benchmarks for database, storages on Linux systems
